11th November 2024

Dear Parents and Carers

We are launching our yearly Science and Art competition that we would love you to join in with. Please see the flyer attached for more information on your project.

Context:

The Artemis program is a Moon exploration program led by National Aeronautics and Space Administration (NASA), formally established in 2017. It is intended to re-establish a human presence on the Moon for the first time since the Apollo 17 mission in 1972. The program's stated long-term goal is to establish a permanent base on the Moon to facilitate human missions to Mars.

Watch this video for more information

<https://www.youtube.com/watch?v=p-vzeMoNlxI>

Your challenge:

With this exciting space exploration mission in mind, I would like you to design, build, paint, or research what a future lunar base needs! Whether through a model, drawing, or presentation, show your vision for living on the Moon.

You could use many materials for your Luna Base such as junk model, Lego, painting, presentation on a computer, the choices are endless.

Please have your projects submitted to your class teacher or Mrs Farrell by Monday 2nd December 2024. There are prizes to be won, badges and certificates!

Let's make science creative! I look forward to seeing your projects.

Thank you

Mrs N Farrell

EYFS and Science Lead
