**Headteacher:** Mrs J Wass BA (Hons) NPQH

14<sup>th</sup> March 2025

Dear Parents and Carers

Exciting News, it is that time of year again for our British Science Week competition alongside The Stone Ogden Trust Group, a multi school science competition. Each year we have a fantastic outcome of entries which we look forward to seeing and hearing all the fun children have with science.

British Science week has fast approached and as a school we have engaged in many science activities this week following the theme of **Change and Adapt**. The Stone Ogden Trust are now getting involved by hosting our own school science fairs, and this is where we need you and all our budding scientists!

### **The challenge:**

To follow the theme, **Change and Adapt**, your child can take a box (any size you wish but made out of card/cardboard) think creatively and change and adapt this into something else. The possibilities are endless!

All we ask is for you to engage in science with your child and let them experiment. You can take videos or photos to send into school at [sciencefair@st-michaels-stone.staffs.sch.uk](mailto:sciencefair@st-michaels-stone.staffs.sch.uk) or you can bring your experiment to school. The deadline for science projects is Monday 31<sup>st</sup> March 2025, leaving the remainder of the week a chance for the projects to be judged and winners chosen.

### **Some ideas of how to present your work:**

- Build and create
- Video your project
- Make a photo collage of your creation
- Take photos and write about
- Make a poster

All children who enter will receive an Ogden Trust Badge and certificate and then winners will be chosen from each key stage for some extra prizes. This year British Science Week is all about '**change and adapt**' so let's become scientists, explore, research and experiment. I look forward to seeing your projects.

Thank you  
Miss J Barrington  
Year 3-4 Class Teacher
