Dear Parents and Carers

Re: Science and Art Competition

We are launching our yearly Science and Art competition that we would love you to join in with. Please see the flyer attached for more information on your project.

Context:

The National Aeronautics and Space Administration (NASA) have sent many robots to drive around Mars to take pictures and collect samples to learn if the planet ever had life. NASA is working on plans to send humans to Mars in the future using all of the information that the robots are sending back.

SpaceX is a private company that is also working to send people to Mars. They want to build a city on Mars one day so people can live on another planet.

Your challenge:

With this exciting space exploration mission in mind, I would like you to design, build, paint, or research what a future Mars colony will look like! Whether through a model, drawing, or presentation, show your vision for living on another planet.

You could use many materials for your Mars colony such as junk model, lego, painting, presentation on a computer, the choices are endless.

Please have your projects submitted to your class teacher or Miss Barrington by **Friday 21st November 2025**. There are prizes to be won, badges and certificates!

Let's make science creative! I look forward to seeing your projects.

Thank you.

Miss J Barrington
