9<sup>th</sup> March 2026

Dear Parents and Carers

Exciting News, it is that time of year again for our British Science Week competition alongside The Stone Ogden Trust Group, a multi school science competition. Each year we have a fantastic number of entries which we look forward to seeing and hearing all the fun children have with science.

We are celebrating British Science week from today following the theme of **Curiosity, what's your question?** During the week the Stone Ogden Trust which we are part of are getting involved by hosting our own school science fairs, and this is where we need you and all our budding scientists!

### **The challenge:**

Over the last couple of weeks, the children at St Michael's have been thinking of their own science questions they want answered ranging from 'how long do hippo's stay underwater?' to 'why do we have planets in space?' Our children from Nursery to Year 4 have thought of the most amazing questions and it would be wonderful to investigate these and find some answers.

Your task if you choose is to engage in science with your child and let them investigate. The deadline for science projects is Monday 23<sup>rd</sup> March, leaving the remainder of the week a chance for the projects to be judged and winners chosen.

### **Some ideas of how to present your work:**

- Video your project and be a scientist on TV
- Build and create
- Make a poster
- Make a photo collage of your creation
- Create an art piece

All children who enter will receive an Ogden Trust Badge and certificate and then winners will be chosen from each key stage for some extra prizes. This year British Science Week is all about **'curiosity'** so let's become scientists, explore, research and experiment. I look forward to seeing your projects which I will display during British Science Week for all to see.

Thank you

Mrs N Farrell

EYFS & Science Lead
